

DREAMING IN TEAL

MOODBOARD
V.01

Just a simple dude who wants to create awesome stuff —

That pretty much sums it up. Whether it's solving a complex design problem, or just fixing the coffee machine in the office, I aim for simple, intuitive solutions that will improve the lives around me. I studied graphic design at San Jose State University and received my BFA in 2012. Oh, and I love teaching myself HTML/CSS/JS, so I developed this site myself, with code only a mother could love.

Currently contracting as a Product Designer @ Facebook 👍
